### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Hails on August 24, 2004.

The application has been amended as follows:

***In the claims:***

Cancel claims 7-9 and 23-26.

***Allowable Subject Matter***

1. Claims 1-6 and 10-15 are allowed.

***Response to Arguments***

2. Examiner acknowledges Applicants arguments regarding the traverse of restriction requirement, but maintains that a burden does exist. The first group includes a power control input coupled to the hit/miss output of a UOP cache (as depicted for example in Fig. 3, and in Fig. 4 at the upper inputs to 330 and 340), while the second group includes a power control input coupled to the output of a delay element (as depicted in Fig. 4 at the input to 360). The addition of the limitations of claims 4 and 5

to claim 1 (the first group) do not require a power control input of a data fetch unit of the UOP cache, nor that the power control input is coupled to a delay element, while no limitations from the second group require a power control input coupled to a hit/miss indicator, or a UOP cache.

***Conclusion***
